SUMMARY

Information Technology and Management undergraduate at the University of Moratuwa with a strong interest in DevOps, cloud computing, and automation. Passionate about building scalable systems and applying emerging technologies to solve real-world problems. Experienced in web development, IoT-based systems, and cloud-ready application design through academic and personal projects.

EXPERIENCE

Developer – Software Branch

[IoT and Embedded Systems Research Labs – Faculty of IT University of Moratuwa](#)

📅 08/2025 - Present

EDUCATION

B.Sc.(Hons) Information Technology and Management
[University of Moratuwa](#) 📅 03/2024 - 12/2028

VOLUNTEERING

Co Director – IT Avenue

[Rotaract Club of University of Moratuwa](#) 📅 09/2025 - Present

Led the club's IT initiatives by managing digital infrastructure, maintaining online platforms, and supporting technical operations across projects and events.

IT Team Leader

[Rotaract Club of University of Moratuwa](#) 📅 07/2025 - 09/2025

Led the IT team responsible for maintaining digital infrastructure and supporting technical operations for club projects.

Project Co-Chairperson

[Rotaract Club of University of Moratuwa](#) 📅 07/2024 - 09/2025

- **SkillSprint** - Organized IT awareness sessions for undergraduates and coordinated technology-focused learning events.
- **Data Storm 6.0** - Supported an inter-university data analytics competition in collaboration with University of Colombo and John Keells Group.
- **Devthon 2.0** - Co-organized a web design and development competition guiding students through ideation, UI/UX design and full-stack development.
- **Mora TechConnect** - Led a 12-month IT educational initiative with bi-weekly sessions, coordinating industry experts and organizing webinars and robotics workshops.

PROJECTS

AirLux – e-commerce and service management platform for air conditioning products and services

📅 10/2025 - Present

Developing a web-based platform using Angular, Node.js, and MongoDB to manage AC sales, installation, service scheduling, warranty tracking, and inventory operations through a centralized system with role-based access control.

Player Dashboard – IoT Cricket Training System

📅 09/2024 - 08/2025

🔗 <https://github.com/Dashintha-Prabashwara/Cricket-Drill-Trainer-WEB>

Web platform integrated with ESP32 sensors for player performance tracking, real-time analytics, and automated player ID generation.

Personal Portfolio Website

📅 02/2025 - 03/2025

🔗 https://github.com/Dashintha-Prabashwara/Portfolio_V1.0

Responsive portfolio built with HTML, CSS and JavaScript showcasing projects and skills. Deployed using Vercel.

Learning Management System (Java)

📅 10/2023 - 11/2023

🔗 https://github.com/Dashintha-Prabashwara/Learning-Management-System_JAVA

Desktop LMS built using Java Swing and MySQL with authentication, email activation, logging using Log4j and XML data handling.

SKILLS

Java	JavaScript	CSS	HTML
AWS DynamoDB	API Gateway	Lambda	
Java Swing	NetBeans	MySQL	
GitHub	Angular	Node.js	MongoDB
